

## FOR IMMEDIATE RELEASE

### **CET remains open during Corona Virus precautionary measures. Message from CET Corporate Offices on training school status.**

Over the past few weeks, it's become clear that the world is facing an unprecedented challenge. Like you, we are deeply concerned and want to do what we can to help keep our communities and our families safe and healthy.

We are continually monitoring current events and taking our cues from federal and state authorities, as well as experts at the World Health Organization (WHO) and Center for Disease Control and Prevention (CDC) to do our part in protecting our students and CET family.

**We want to assure our students and staff that, in this time of uncertainty, our schools will remain open until such time as closures are required.** As things evolve, we are actively monitoring new developments and assessing risks so that we can quickly adapt and continue to provide services. We will continue to communicate with you in a timely and transparent way.

We recognize this is a challenging time for all, and we remain deeply committed to the safety of our students, staff, and communities.

As with others in our community CET is rising to the occasion of prevention, and we are taking the following proactive steps to ensure the health of our students, staff and community at large:

- CET's training model is based on hands-on lab work, and CET is taking steps to modify our training model to accommodate distance learning as much as possible.
- We have communicated to staff and students proper hygiene measures such as hand washing for 20 secs, staying home when sick, and limiting interactions if signs of sickness are present.
- Students who have concerns or family obligations may take a Leave of Absence (LOA).

It is important to get quality information and we recommend following the recommendations of the County Department of Health. For current information on the Corona Virus see the [California Department of Public Health's daily updates](#), the [City of Alexandria Virginia Public Health](#), and the [City of El Paso Public Health](#).
